PASIKANTI ANUSRI

FRESHER ARCHITECT

I am a fresher in architecture, looking forward to starting my professional journey and learning through real projects and experiences. I enjoy exploring how simple ideas, materials, light, and nature can come together to create comfortable and meaningful spaces.

During my academic years, I have explored architecture through design, drawings, 3D modelling, and visual representation. I enjoy learning, trying new things, and understanding the process behind good design.

As I begin my professional journey, I hope to learn from others, improve my skills, and grow as a designer.

PUB INTERIORS

"A space inspired by places, people and cultures."

TYPOLGY- Public/Semi-Public

LOCATION- Hyderabad

ACADEMIC PROJECT- Semester 8, SVCA

SOFTWARES USED- Autocad, Sketchup, Enscape.

This project is a pub interior based on the concept "Travel the World." The idea is to bring the feeling of travelling into the space, where every area gives a glimpse of a different place and culture.

The design takes inspiration from India, Japan, France, Africa and Mexico. Each place has its own colours, materials, furniture, patterns and decorative elements, which are used to create a different mood for each space.

The aim is to make the pub more than just a place to eat and drink. It is designed as a space where people can experience different cultures while spending time with friends and family.

CONCEPT

TRAVEL THE WORLD

*A Journey Through Cultures - One
Sip at a Time*

"Travel the World" is a globally-inspired experiential space that transports guests on a cultural journey – one sip at a time. More than just a pub, it is a storytelling destination influenced by nomadic adventures, desert hideouts, and rustic campsites. The space celebrates handcrafted artifacts, vintage decor, and regional aesthetics through a rich palette of earthy and natural tones.

It seamlessly blends textures, ambient lantern lighting, and traditional crafts from India, Japan, Africa, Mexico, and France. Each zone is a sensorial travel stop – where guests can sit in tented lounges, sip from tin cups and flasks, and feel immersed in global heritage. The design bridges warmth, wanderlust, and worldly nostalgia to offer an unforgettable escape into the essence of cultures across continents.

SIDE ELEVATION

AFRICAN STYLE WALL ELEVATION

RECEPTION WALL ELEVATION

INDIAN STYLE WALL ELEVATION

The African-inspired wall elevation uses earthy tones, natural textures and handcrafted elements to create a warm and grounded atmosphere. African masks and motifs are used as wall accents, while rattan seating and woven details add a natural, handcrafted feel. The arched wall niches and patterned elements bring a subtle reference to African architecture and craft, keeping the space connected to the overall travel-inspired pub concept.

The reception wall reflects the "Travel the World" concept through a world map and clocks representing different countries. Warm lighting, wooden furniture and neutral tones create a simple and welcoming entrance, while the travel elements set the theme for the pub.

The bar counter combines brick, wood and textured finishes to create a warm and earthy interior. Exposed brick is used on the walls to add a rustic character, while wooden panels bring warmth and a natural feel to the space. The diamond-patterned textured wall adds visual interest behind the seating area, while the arched wooden bottle displays give the bar a subtle Indian character. Glass, metal stools and small decorative elements are used to add contrast and keep the overall design balanced.

FOURTH FLOOR

MEZZANINE FLOOR

FLOORING LAYOUTS

The fourth-floor flooring layout uses a combination of wooden flooring, ceramic tiles and terracotta flooring to define different spaces. Wooden flooring is used in the main pub areas to create a warm and comfortable atmosphere, while ceramic tiles are used in circulation and service areas. The terracotta flooring adds an earthy touch to the outdoor seating area and complements the overall warm material palette.

The mezzanine flooring layout uses ceramic tiles, hardwood flooring and patterned finishes to create variation between the different spaces. The wooden flooring adds warmth to the seating areas, while the patterned hardwood creates a visual feature. Ceramic tiles are used in the remaining areas for a clean and practical finish, keeping the mezzanine connected to the overall pub design.

FALSE CEILING LAYOUT

The false ceiling combines wood-finished slats, recessed spotlights, concealed LED strips, and pendant fixtures to create a warm and atmospheric pub ambience. The layered lighting highlights key zones such as the bar, seating, and circulation areas, while the ceiling design integrates essential services and complements the overall material palette.

The pub interior is designed to create a warm, vibrant, and immersive social atmosphere, combining contemporary comfort with a rustic pub character. Rich wood flooring and ceiling finishes, exposed brick, colourful wall panels, and black metal railings create a layered and visually engaging material palette. The double-height space and mezzanine enhance the sense of openness while maintaining a strong connection between the different seating areas.

The curved bar and live-music stage serve as the main focal points, encouraging interaction and entertainment. Warm recessed lights, pendant fixtures, concealed LEDs, and candlelight create a soft, moody ambience, highlighting the textures and architectural elements throughout the space. Subtle greenery and intimate seating arrangements add comfort and balance, making the pub suitable for casual dining, social gatherings, and evening entertainment.

02 WORKING DRAWINGS

"A space inspired by places, people and cultures."

TYPOLGY- Residential

LOCATION- Hyderabad

ACADEMIC PROJECT- Semester 6, SVCA

SOFTWARES USED- Autocad

This section presents a complete set of working drawings prepared for apartment design. The drawings cover every stage of construction and detailing, including floor plans, elevations, and sections that define the spatial organization and overall form.

Technical aspects such as brick masonry details, slab layouts, sanitary and plumbing systems, and foundation plans are documented to ensure structural clarity and service integration. Each drawing is prepared with precision to guide execution on site.

Electrical layouts and other service drawings are also included, making the set comprehensive and practical. Together, these working drawings translate design concepts into buildable instructions, bridging the gap between ideas and construction.

03 NIFT CAMPUS

"Shaping spaces for learning, interaction, and creativity."

TYPOLGY- Public/Semi-Public

LOCATION- Nava Raipur, Chattisgarh

ACADEMIC PROJECT- Semester 10, SVCA

SOFTWARES USED- Autocad, Sketchup, Enscape, photoshop.

The project proposes a new campus for the National Institute of Fashion Technology (NIFT) at Nava Raipur, Chhattisgarh. The design brings together academic, administrative, and residential spaces within a connected campus environment.

The planning is shaped by interconnected built forms, courtyards, and landscaped open spaces that encourage interaction, informal learning, and a strong connection with nature. Simple contemporary forms, earthy materials, brick elements, glass, and greenery create a cohesive architectural language.

Overall, the project explores how architecture can create a functional, interactive, and creative learning environment for the NIFT community.

01 SITE ANALYSIS

LOCATION & CONTEXT

Location: Sector 24, Nava Raipur, under Nava Raipur Atal Nagar Development Authority

URBAN CONTEXT

ADVANTAGES (STRENGTHS)

- Planned smart infrastructure (underground services, wide roads)
- Good connectivity to Raipur & Airport
- Clear zoning (mainly institutional/ office use)
- Green and sustainable environment
- Upcoming IT hub & corporate development

CONSTRAINTS (WEAKNESSES)

- Low population & inactive surroundings
- Limited Shops and daily-use facilities
- Dependence on Raipur for services
- Slow development and occupancy
- High investment and land value potential

SITE SURROUNDINGS & APPROACH

ENVIRONMENTAL FACTORS

VEGETATION ANALYSIS

- Sparse vegetation on site - mostly open/barren land with very few trees
- Surroundings show mixed vegetation - patches of agricultural fields and scattered greenery
- Dense green pockets nearby - especially around water bodies and institutional layouts
- Presence of lakes/ponds supports localized vegetation growth
- Low shading on site -> high heat gain and exposure

SWOT ANALYSIS

- Planned smart infrastructure (underground services, wide roads)
- Good connectivity to Raipur & airport
- Clear zoning (mainly institutional/office use)
- Green and sustainable environment

- Low population & inactive surroundings
- Limited shops and daily-use facilities
- Dependence on Raipur for services

- Upcoming IT hub & corporate development
- Future metro and infrastructure growth
- High investment and land value potential

- Slow development and occupancy
- Competition from developed Raipur city
- Dependence on government-led projects

02 CONCEPT DEVELOPMENT

THE POROUS MONOLITH

Solid Form, Fluid Light, Living Voids

My concept is called like a single block. These opening people to move in. I used the idea of so some spaces for interstitial spaces and experience the. Overall, the design empty spaces that

03 SITE CONTEXT & ZONING

led **Porous Monolith**. It starts with a strong solid form, but instead of keeping it closed, I create openings inside form spaces in between, which allow light, air, and view.

Chiaroscuro to bring contrast between light and shadow, el' bright and open while others feel calm and shaded. The act as connecting areas where people can pause, interact, ie space.

n is not just a solid building, but a mix of built and t work together to create a lively and comfortable campus.

- LIGHT vs SHADOW (Chiaroscuro)**
- Shaded walkways
 - Controlled Daylight
 - Thermal Comfort
- WIND MOVEMENT**
- Ventilation Corridors
 - Cooling Courtyards
 - Microclimate Creation

CULTURAL RESPONSE

THE "MODERN HEIRLOOM"
Reinterpreting traditional courtyards (Aangan) and expressing Chhattisgarh's heritage through materiality and spatial experience

RELEVANCE

- Climatic Relevance: Fighting the Raipur Heat**
The Monolith acts as Thermal Shield. Pores and courtyards channel breeze and self cooling spaces.
- Cultural Relevance: The "Modern Heirloom"**
Rooted in local materials, patterns and courtyard culture while expressing a contemporary identity.

CHIAROSCURO → POROUS MONOLITH

LANDUSE & ZONING

The area around Atal Nagar mainly includes institutional, recreational, and green open spaces, with nearby attractions like Parkhuti Mukangan and Jhanjh Lake. The site falls within an institutional / public-semi public zone in the planned city, surrounded by green, cultural, and institutional developments.

- Site
- Buildings
- Water Bodies
- Green Spaces
- Roads

ZONING

SPACES INCLUDED

- Academic Blocks
- Administrative Blocks
- Hostel Blocks
- Faculty Housing
- Sports Facilities
- Canteen, Resource Center, Amphitheatre.
- Auditorium
- Green Spaces
- Parking Spaces

ZONING STRATEGY

- Public Zone placed near the main entry for easy access and visitor convenience.
- Academic Block is the heart of the campus with direct connection to all major areas.
- Recreational Zone acts as a green buffer providing open space and relaxation.
- Hostels and faculty Housing are placed in the quieter zones for privacy and comfort.
- Future Expansion area kept at the rear side to allow growth without disturbing the campus.

ZONING

- Public Zone:** Admin Block, Auditorium, Entry Plaza, Parking
- Semi-Public Zone:** Sports Facilities, Amphitheater, Canteen.
- Semi-Private Zone:** Academic Blocks, Resource Center
- Private Zone:** Faculty rooms and Hostel Facilities

1 DEVELOPMENT

01 INITIAL MONOLITH

A single solid mass is established to create a strong institutional identity and presence.

02 CREATING POROSITY

Strategic voids are carved based on functional requirements to allow light, ventilation and visual connectivity.

03 REFINING THE VOIDS

The voids are carved out and refined and connected to define academic clusters, collaborative spaces and circulation.

04 FINAL POROUS MONOLITH

The final form balances solidity and openness, creating a porous monolith that fosters interaction, learning and climate responsiveness.

MONOLITH

around the idea of a "Porous Monolith" - porosity. The building form is carved create pockets, enabling natural light, ventilation ensuring a strong institutional character.

ATION WITH CONTEXT

04 INTERNSHIP WORKS

"Learning by doing, designing with purpose."

TPOLOGY- Residential / Semi- Public

LOCATION- Hyderabad

ACADEMIC PROJECT- Semester 9, SVCA

SOFTWARES USED- Autocad, Sketchup,Enscape.

During my internship, I had the chance to work on real design projects that helped me connect classroom learning with professional practice. I was involved in planning spaces, preparing drawings, and exploring interior details, which gave me a clearer understanding of how ideas take shape in reality.

I worked on residential and semi-public spaces, focusing on layouts, furniture, and customized interiors. Using tools like AutoCAD, SketchUp, and Enscape, I learned how to translate concepts into precise drawings and visualizations.

This experience taught me the importance of balancing creativity with functionality and client needs. The projects included here reflect my growth as a designer and the skills I developed during my internship journey.

Wardrobes and headboards combine storage with aesthetics, crafted from ply and veneer finishes. Hidden compartments and layered detailing maintain a clean, modern appearance.

Quartz stone counters, modular drawers, and pinewood detailing define a functional kitchen. The design emphasizes efficiency, durability, and refined finishes suited for everyday use.

A sleek entertainment unit with open shelves, drawers, and mirror-backed panels. Veneer and ply finishes add warmth while maintaining a modern look. Designed as a functional centerpiece that blends storage with style.

Wardrobes combine open shelving, concealed storage, and modular drawers for flexibility. Painted glass panels and veneer finishes enhance the aesthetic appeal. Clean lines and organized layouts ensure practicality with elegance.

M.BED ROOM WARDROBE

M.BED ROOM TV

Integrated wardrobes paired with a custom headboard create a cohesive design. Hidden storage and lift-up panels maximize utility without clutter. Veneer finishes and balanced detailing add sophistication to the space.
